NOVARACLEANING LLC

07 How a booking is finished

What the customer does after they say yes, and what the system does. Sending a link is not a booked visit.

Novara Cleaning LLC. Phone (844) 735-2070. Bookings support@novaracleaning.com. Speak a dollar amount only after a live price function returns it.

On the website

- Page 1: ZIP at try.novaracleaning.com/book/zip. Out of area stops here. Offer the waitlist.
- Page 2: home size, service, and add-ons. The price on this page is the price.
- Page 3: date and an arrival window, 8-12, 12-4, or 4-8.
- Page 4: checkout. They pay the 50% deposit on Stripe, on our site.
- Page 5: home details. Beds, baths, pets, access, and the agreements. The visit is not fully set until this page is finished.
- Then the confirmation email: booking number, date, arrival window, service, address, total, deposit, and balance.

On a phone or text, through the live functions

- create_booking only creates a pending_payment row and a Stripe deposit link.
- The customer pays on that link. Never take a card number on the call.
- The visit becomes real when Stripe confirms the deposit.
- They still finish the home-details page: pets, access, and the agreements. If they pay and stop, a reminder email goes out.
- The confirmation email, with booking number, date, window, service, address, total, deposit, and balance, is sent by the payment path.

What to tell them

I am sending a link. Open it, confirm the service and the window, and pay half. Then finish the short details page. When the deposit clears, the confirmation email has the booking number and the balance due after the clean.

What not to tell them

- Do not say the visit is confirmed when you have only sent the link.
- Do not ask for a card number, a gate code, or an alarm code.
- Do not send a summary at a price the payment link does not show.
