NOVARACLEANING LLC

08 Live functions

The only actions the receptionist may execute. Call them in order. Speak the return value, not a number you worked out yourself.

Novara Cleaning LLC. Phone (844) 735-2070. Bookings support@novaracleaning.com. Speak a dollar amount only after a live price function returns it.

Endpoint: https://sxdraeptzuamsgjcvfeg.supabase.co/functions/v1/ai-tool-router

Call the function. Speak only what it returns. Do not calculate a price, invent a time, or promise a discount the function did not save.

Call in this order

- lookup_customer as soon as you have a phone number
- check_service_area as soon as you have a ZIP
- get_price_estimate before you say any dollar amount
- get_available_slots before you offer a time
- create_booking only after the customer agrees and every required field is filled
- handle_keyword for R, C, YES, NO, STOP, or HELP
- add_to_waitlist when the ZIP is not served
- escalate_to_human for refunds, damage, legal, commercial, over 5,000 sq ft, or when they ask for a person

lookup_customer

Pass: phone

Returns: Name, email, address, Glow plan, next booking, outstanding balance, and a pay link if money is owed.

Use what it found. Do not ask again for a name or address it already returned.

check_service_area

Pass: zip_code, 5 digits

Returns: serviced true or false, city, state, and zone A, B, or C.

If serviced is false, offer the waitlist and do not quote.

get_price_estimate

Pass: home_size_id, service_type, add_ons, membership_plan

Returns: total_cents, deposit_cents, remaining_cents, and human_summary.

Read human_summary. Home-size ids are 0_999, 1000_1500, 1501_2000, 2001_2500, 2501_3000, 3001_3500, 3501_4000, 4001_4500, 4501_5000, 5000_plus. Services are standard, deep, moveInOut, combo. Add-ons this function accepts are fridge, oven, and windows.

get_available_slots

Pass: service_date as YYYY-MM-DD

Returns: Up to five slot ids. Offer only those ids.

This function rejects Sundays and any date inside 3 days. The website offers 8-12, 12-4, and 4-8. Do not mix the two. Use the slot id the function returned.

create_booking

Pass: first_name, last_name, email, phone, address, city, state, zip_code, bedrooms, bathrooms, dwelling_type, home_size_id, service_type, service_date, time_slot. Optional: add_ons, membership_plan.

Returns: booking_id, booking_number, payment_link, deposit_cents, total_cents. Status is pending_payment.

Send the payment link exactly. The visit is not booked until they pay. Dwelling types are house, apartment, condo, townhouse, office_space, mansion.

handle_keyword

Pass: phone and keyword R, C, YES, NO, STOP, or HELP

Returns: reply_text

Send reply_text. Do not improvise a cancel or reschedule.

add_to_waitlist

Pass: zip_code, email, phone. Optional first_name and last_name.

Returns: ok and waitlist_id

Tell them they will hear first when that ZIP opens.

escalate_to_human

Pass: phone, reason, summary. Reasons: quality_issue, refund, legal, custom_quote, competitor_match, safety, phone_request, ai_loop, other.

Returns: ok

Tell them a person will follow up, then stop selling.

What booked means

- create_booking only creates a pending_payment row and a Stripe deposit link.
- The customer pays on that link. Never take a card number on the call.
- The visit becomes real when Stripe confirms the deposit.
- They still finish the home-details page: pets, access, and the agreements. If they pay and stop, a reminder email goes out.
- The confirmation email, with booking number, date, window, service, address, total, deposit, and balance, is sent by the payment path.

What these functions cannot do yet

- The $10 or $15 courtesy is not a field on create_booking. The function recalculates the price and ignores a discount you say out loud. Do not promise $10 or $15 until a function saves that exact total on the payment link.
- get_price_estimate uses the older price rules and its summary can say 50% NEW. The booking screen uses the Training Guide price, then condition, then zone. If the two totals disagree, do not quote. Escalate.
- There is no function that only saves a quote. create_booking is the save, and it also creates the pay link.

- Commercial, short-term rental host booking, and hiring are not these functions. Escalate those.
